

PERMANENT MARKING PENS

A must for Process House, Dyeing and Printing mills, power looms, hosiery & Laboratories.

Product Details

It has been a practical problem for Textile processors-- engaged in Dyeing, Bleaching, Printing and calendaring, to mark the various bales before processing for proper identification after dyeing and printing. The method of embroidery using crayons and stamping were not economical and were imperfect, to solve the marking problems of Greige Fabric.

EVERON-MARKERS is an aluminium cigar type tube filled with ink, with a hemispherical rubber bulb at one end, when pumped slightly compresses ink towards a fine ball point for easy writing on grey of any nature. A steel ball is provided at the tip for smooth running, regular flow and automatic sealing after marking. The overall dimensions of the tube will be of any medium size cigar tube containing of semi liquid ink, which is sufficient for marking on 500 to 700 Bales. Varying ball point sizes from 2 to 4.

EVERON-PENS is an aluminium cigar type tube filled with ink, with a hemispherical rubber bulb at one end, when pumped slightly compresses ink towards a fine ball point for easy writing on grey of any nature. Basically using a slotted template for marking datum line when testing dimensional stability (shrinkage) to washing and processing of fabrics (**Laboratories - Ruler test**).

Advantage of EVERON MARKERS + PENS:

PACKING: 15 PCs per box, Each PC packed in single carton (“lunch-box”).

Colours available: ● Yellow ● Black ● Red ● Green

DIRECTIONS FOR USE:

- Hold the tube vertically.
- Gently press the tube to maintain the required flow of ink.
- Keep a cardboard piece below the cloth for stiffness while marking.
- Clean the tip after each use to keep it ready for the next use.
- Replace the cap after each use.
